

GD-3300

Roll to Roll UV Printer for double-sides printing

Grando UV Ink

Technical Characteristics

The machine is designed with two carriages for vertical printing. It uses stronger rubber bars for delivering the media. it has robust and stable body which can print both on soft and rigid media.

Benefiting from the environment-friendly UV LED curing technology, the machine achieves longer life, lower energy consumption.

The machine can print on same good quality pictures and same colores on the two sides of media simultaneously. It also can print different pictures on the two sides of media with good performance.

Technical Specifications

Model		GD-3300	GD-3300Pro
Print Head Type		Konica1024A industrial heads	
Head Number		16 pcs	24 pcs
Ink Color		CMYK	
Ink Type		UV INK	
Ink Supply		Pump ink supply	
Speed	Draft Mode	40 m ² /h	60 m ² /h
	Photo	36 m ² /h	54 m ² /h
Media	Dimension	3200mm	
	Type	Perforated banner, soft film, stick vinyl, PET, PVC banners	
	Transfer	Motor automatic feeding and taking up system	
Cleaning		Automatic pump cleaning system	
Interface		USB	
Environment		Temperature: 18 C -30 C , Humidity: 30%-80%	
Power Supply		Rated frequency: 50HZ/60HZ Rated voltage: AC220V [±10%]	
Size		5800(L)×1450(W)×2100(H)(mm)	
Weight		2450kg
